Dosage

MS HoofClean can be applied automatically with the MS AutoHoofClean system. MS AutoHoofClean is an automatic and skin-friendly approach to footbath management, and is particularly suitable for use on milking robot farms. The dosage of MS HoofClean is determined based on the degree of hoof problems, (dosage can be set for llow, medium and high problems).

MS AutoHoofClean is optimised for administering MS HoofClean. The mats automatically release the product when the cows walk over the mats.
