

MS MEGADES

KIEMKILL

MS MegaDes Kiemkill is a disinfectant in powder form against bacteria, yeasts, fungi and viruses in animal housing and associated areas.

- Fast acting disinfectant
- Ideal for footwear disinfection baths
- Effective against bacteria, yeast, moulds, and viruses
- Colour indicates effectivity

**Active substances:**

Penta potassium bis (peroxymonosulphate)bis(sulphate): 45%
Sodium dichloroisocyanurate: 2.5%

Use biocides safely. Read the label and product information before use.

Your stable perfectly disinfected

Good cubicle hygiene results in good teat condition and udder health.

Germ-free calf pens prevent the spread of bacteria that depend on the surroundings.

Proper disinfection of the pens improves the health and performance of your pigs.

Sprinkling it into the spaces on the floor prevents bacterial growth and improves animal health.

Furthermore, MS MegaDes Kiemkill is extremely well-suited for use in a foot disinfecting bath or mat. This is important for good, external biosafety and plays a significant role in keeping germs at bay, resulting in decreased (infectious) animal diseases as well.

Efficacy

MS Kiemkill has been approved by the Ctgb (Board for the Authorisation of Plant Protection Products and Biocides, which assesses the safety and function of products) and has been proven to be effective against illness-causing bacteria, micro-organisms, viruses, and fungi.
